

ABHISHEK JADHAV

0xAbhi13

Creative Developer | C++ - Python - JavaScript - BCA Student -- Baramati, Maharashtra

contact.0xabhi13@gmail.com | github.com/0xAbhi13 | linkedin.com/in/0xAbhi13 | Baramati, Maharashtra, India

SUMMARY

BCA student from Baramati learning the craft from the ground up -- **C++** for fundamentals, **Python** for shipping, **JavaScript** for the web. Building small, real products in public. Focused on how memory moves in C++, how Python automates the boring bits, and how JavaScript brings a page to life. I pick a small problem, build something that solves it, get it wrong a few times, read the errors properly, and ship a version I'm proud of. Currently exploring **DSA, React, and system design**. Open to internships and junior roles.

EDUCATION

Bachelor of Computer Applications (BCA) -- Currently Enrolled

BCA Program -- Baramati, Maharashtra

2026

CGPA: Currently Pursuing

Computer Science Fundamentals - Data Structures - Databases - Software Development -- Applied daily through side projects and consistent shipping.

SKILLS

Programming: C++ (70%) - Python (75%) - JavaScript (68%) - DSA -- Learning

Web Development: HTML5 (95%) -- Semantic & Accessible - CSS3 (90%) -- Layout - Motion - JavaScript -- Vanilla - GSAP - Lenis - Flask

AI / Computer Vision: OpenCV - MediaPipe - NumPy - YOLOv4-tiny - Web Speech API - Openverse API

Tools & Workflow: Git (78%) - GitHub (80%) -- @0xAbhi13 - VS Code - REST APIs

Currently Levelling Up: React - GSAP Advanced - Node.js - Deeper DSA - System Design Basics

PROJECTS — 5 SHIPPED

Developer Portfolio -- Web - Editorial | Live - <https://0xabhi13.github.io/MyPortfolio/> - GitHub: 0xAbhi13

Stack: HTML5, CSS3, JavaScript, GSAP, Lenis

This website -- fully responsive, dark, editorial portfolio built from scratch with plain HTML/CSS/JS. No frameworks, no build tools -- just solid fundamentals and cinematic motion.

- Responsive editorial layout -- hero left (title+desc) vs visual (photo centered)
- Cinematic loader, grain, particles, magnetic buttons, tilt
- ScrollTrigger choreography -- 39 triggers
- CDN GSAP 3.12.5 + Lenis 1.1.18, deployed on GitHub Pages

0xEmotion -- AI - Vision | Live - GitHub: 0xAbhi13/0xEmotion

Stack: Python, Flask, OpenCV, NumPy

AI facial expression recognition that runs entirely offline. Flask + OpenCV detect faces from webcam or upload and classify the visible expression.

- Face detection from webcam or image upload
- Offline classification -- no cloud API
- Transparent fallback when no trained model

0xMagicSearch -- Vision - Real-time | Live - GitHub: 0xAbhi13/0xMagicSearch

Stack: Python, Flask, OpenCV, YOLOv4-tiny

Local AI object detection that turns your webcam into a scanner. YOLOv4-tiny via OpenCV identifies objects in real time with a local knowledge base.

- Real-time detection via webcam
- YOLOv4-tiny with OpenCV DNN
- Local knowledge base, no cloud

0xAirCanvas -- Interaction - Vision | Live - GitHub: 0xAbhi13/0xAirCanvas

Stack: Python, Flask, OpenCV, MediaPipe

Draw in thin air. MediaPipe Hands tracks your fingertip through the webcam, turning it into a smooth digital pen with gesture controls.

- Hand tracking via MediaPipe Hands
- Gesture controls (clear, color, thickness)
- No stylus / touch hardware needed

0xVoiceVision -- Voice - Search | Live - GitHub: 0xAbhi13/0xVoiceVision

Stack: Python, Flask, Web Speech API, Openverse API

Speak a word and see it. Web Speech API transcribes voice, Flask cleans the query, Openverse pulls a matching image with animated reveal -- no API key.

- Voice -> text via Web Speech API
- Free Openverse search -- no API key
- Animated reveal of matched image

CERTIFICATIONS — VERIFIED

Complete C++ Language -- Sheryans Coding School (Jul 2026) - 4834427359730082f339b619

HTML, CSS & JavaScript from Scratch -- Educative (Jul 2026) - FD9G69XC5T

Learn Python 3 -- Educative (Jul 2026) - 7HYRJKNF2B

ACHIEVEMENTS

- **Shipped 5 Projects** -- **Building in Public** -- GitHub @0xAbhi13 - 2026 | - **BCA Journey -- 3 Years Learning** -- From C++ fundamentals to shipping real products, Baramati

- **3 Verified Courses Completed** -- C++ - HTML/CSS/JS - Python 3 (Sheryians & Educative) | - **Cinematic Portfolio -- No Frameworks** -- GSAP + Lenis editorial, immersive

Abhishek Jadhav -- Creative Developer - Baramati, Maharashtra - Built with HTML/CSS/JS & GSAP - github.com/0xabhi13 - contact.0xabhi13@gmail.com - (c) 2026
